### Introduction:

My name is Kevin Zheng, and I am a young high school student who played on the varsity golf team at Phillips Academy Andover. I am passionate about golf and dedicated to inspiring more young kids to take up the sport.

Golf is all about understanding the statistics of your game, but sophisticated statistics are often unavailable to the average player. To address this, I built a user-friendly website that allows golfers to input limited information about each shot.

With this data, the website generates key essential statistics, such as greens in regulation (GIR), par-4 average, and more. It also integrates up-to-date PGA professional statistics for comparison, helping players better understand their game.

Let's score better, play better, and grow the love for golf together!

# Overview - A brief glance of gogolfscore.com

The screenshot shows the homepage of GoGolfScore.com. The browser address bar displays "https://www.gogolfscore.com/home". The navigation bar includes "My Golf Statistics", "Home", "About", "Login", and "Register". A central white box contains a "Welcome to GoGolfScore.com" message with a circular profile picture placeholder. Below this, the "What We Offer:" section lists four features: Score and Shot Tracking, Comprehensive Game Statistics, Personalized Insights, and Compare and Compete Anytime. The "How It Works:" section provides a five-step guide: Register and Login, Add Games, Game Overview, View Statistics, and Sidebar Insights. On the right, a "PGA Pro Stats" table compares user performance to PGA professionals across various metrics.
